Production

Card
Management

Personalization

Issuance

Verification

Centralized Smart Card Management

- Closed-loop security
- Central control, monitoring, management
- Fully customized workflows
- Smooth integration into background systems

High quality card bodies

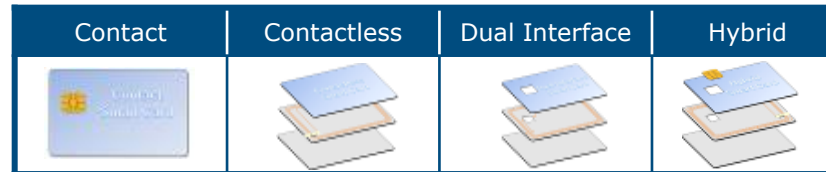

PC or PET based Card Body for

- High Durability (> 10 years)
- Maximum Security
- Maximum Stability
- Flexible usage

Latest Chip Technology

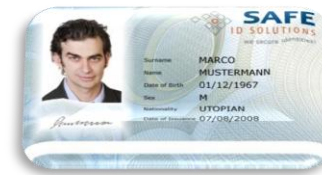

Contact or Contactless (RFID)

- Biometric Data Processing
- High Data Storage
- Multi-Application
- Advanced Security Features

Benchmark Personalization

- High and low volume production
- Photo like quality
- Proven light fastness and stability
- Leading optical security features

SAFE ID provides full Smart Card Infrastructures for any national eID Application

SAFE ID Passport Solutions

Complete solution for full issuance chain

Enrolment-Solution

SAFE BioCap

Perso-Software

SAFE PSS

Manual Systems

SAFE MS 100/300

Automated System

SAFE AS 1000

Border Contr./ QA Solution

SAFE VeriDoc

SAFE BioCap

- Modular and fully customizable enrollment solution
- Easy integration into existing software infra-structures
- Web-based solution using a rich client concept

SAFE PerSoSuite

- Highly Secure Perso Management System
- Modular design to cover for multiple system needs
- High level of scalability adaptable to various personalization workflows

SAFE MS 300

- Manual Perso System with ultra-high printing speed
- Easy Handling through front-in/front-out mechanism
- High quality fully color printing
- Low maintenance and service needs

SAFE AS 1000

- Fully automated modular personalization system
- Piezo inkjet technology with high quality
- Parallel personalization with high throughput rates

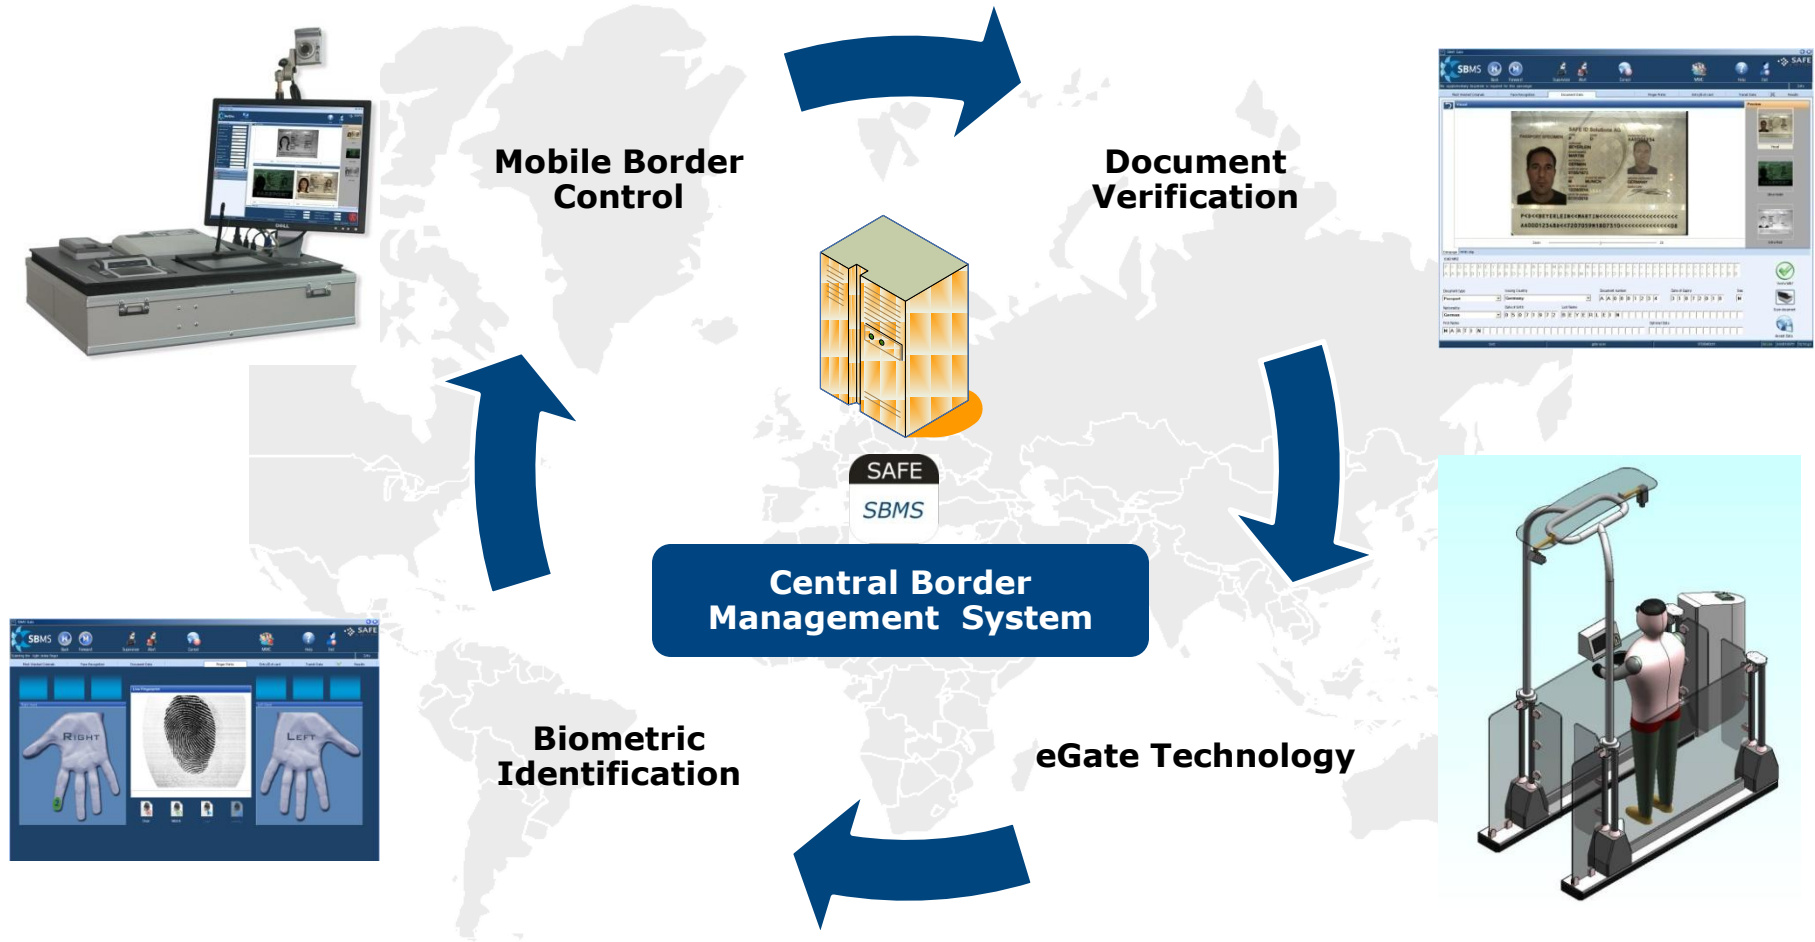

SAFE VeriDoc

- Modular and fully customizable ID document verification solution
- Data Base of over 150 passports and passport versions as well as ID cards to check against
- Support of various reader types

SAFE ID offers the full range of personalization system including HW and SW solutions

SAFE ID Border Solutions

Advanced Technology for secure Borders

SAFE ID offers a Comprehensive Border Control System applicable for any border crossing Environment

Border Surveillance Concept Integration of Biometric Technology

Objectives

- Reliable detection of human activities at green borders
- Identification of persons by database matching

System Basics

- Integration of biometric technologies for stationary and mobile units
- Connection to background databases or locally installed blacklists
- Latest biometric algorithms and software platforms for best recognition
- Human command & control of all activities and identification results
- Central system for data storage and distribution

Human Detection

Full control of pre-defined areas by automated or controlled day / night and underwater camera systems

Human command & control for central coordination of patrol units and intervention in emergency cases

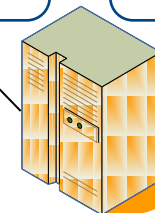

Human Identification

Stationary and mobile units for biometric enrolment and verification

Ad-hoc checking with locally installed black lists

Data storage and matching with central border surveillance systems and databases

Case Study Iraq

Passport Personalization Infrastructure

Passport System – Basic Facts

Customer:	Iraq Ministry of Interior Department of Registration
Capacity:	Up to 10.000 passports / day
Passport Type:	ICAO MRTD
Infrastructure:	Central passport personalization site in Baghdad
Order placed:	2008

SAFE ID Contribution

Products:	• AS 1000 personalization machines • MS 100e personalization machines • Lamination systems • PSS passport management software • Quality assurance system
Features:	Full personalization infrastructure with central management platform
Process:	SAFE ID has supported the government through all planning and implementation steps making sure that a full ICAO compliant system can be realized

Track Record

- ✓ Successful delivery and installation of full personalization hard- and software in Baghdad
- ✓ Integration into customer's databases and issuance infrastructure
- ✓ Intensive operator training and project implementation
- ✓ Full workflow and data management by SAFE ID's PSS platform

The Iraq passport project realizes a complex and individual high-end personalization infrastructure within a difficult environment
